OSHER CHAMELEON EYE SPECULUM

**G-15917
OSHER
CHAMELEON EYE SPECULUM**

**Cataract & Refractive Surgery Today,
January 2011, Top Products of 2010**

Robert H. Osher, MD:

"This new speculum widens the interpalpebral distance, while allowing elevation of the individual lid off the globe through an adjustment of the wire blades."

Human anatomy is so versatile that a standard eye speculum is only a compromise. The Osher Chameleon Eye Speculum brings an end to these limitations.

- Adjustable positioning plate provides safe temporal fixation
- Precise turning mechanism delivers adjustable speculum arms
- Thin line design allows unlimited maneuverability
